GARY WEBSTER & ASSOCIATES LTD

TECHNICAL SALES AGENTS

Welcome to Gary Webster & Associates Ltd

What we do:-

Our sole aim is to assist the following disciplines in the selection of a variety of Commercial Heating Products:-

Architects, Consulting Engineers, Contractors, Local Authorities, University Estate Departments, Prison Service, NHS and The Merchant trade.

We have at our disposal:-

Boilers, Water Heaters, Air Source Heat Pumps, Solar Systems, CHP, VRF, Splits, Chillers, Fan Coil Units, Air Handling Units.

A little about me

I have been in the heating industry since leaving school in 1974.

After several years of experience on the installation side of the business, I ventured into sales.

Having represented some of major manufacturers in our industry, I feel I am in a position to assist in the selection of the right product for your project.

TECHNICAL SALES AGENTS

Gas Condensing

We have a wide range of water heaters which employ condensing technology; which can provide savings on energy consumption and carbon emissions. Our range includes instantaneous, storage and circulating types, with floor-standing and wall-hung options.

Ecocharger

7 models, suitable for either Natural Gas or LPG - Fully modulating pre-mix burner - Multiple flue options - Recovery rates from 540 to 2100 litres/hour, based upon a 50°C temperature rise - Storage capacities from 220 to 488 litres - Ultra quiet operation - WRAS certified

GARY WEBSTER & ASSOCIATES LTD

TECHNICAL SALES AGENTS

Gas Condensing

Condensing technology is employed in most modern gas-fired boilers these days and using such products to replace traditional boilers is a well - established method of saving energy consumption and fuel running costs. Our gas condensing boilers are available in a range of wall-hung and floor-standing models; system design and control are key factors in achieving the highest possible operational efficiencies and we can also offer a number of control options to suit specific requirements.

Herald Boiler

8 models, suitable for either Natural Gas or LPG - Advanced Control Systems – SMART SYSTEM™ Control - Cascade control for up to 8 Boilers - Fully modulating pre-mix burner - Outputs ranging from 41.2 to 228.4kW, based upon 50°C/30°C system design - Stainless steel heat exchanger - Weather compensation

GARY WEBSTER & ASSOCIATES LTD

TECHNICAL SALES AGENTS

As a renewable technology, 'air source' or 'air to water' heat pumps can provide a highly efficient method of supplying heating or hot water requirements for a range of large residential or commercial buildings. Heat pumps can reduce energy consumptions and carbon emissions, and can provide short term payback on investment, particularly when integrated with high efficiency gas-fired boilers and water heaters.

17 models with heating capacities of up to 210 kW - Suitable for LTHW and DHW applications - Low noise levels - Operates at up to 63°C water temperature - COP – up to 4.4 - Scroll compressors equipped with "Economised Vapour Injection - Interface card for Modbus control

TECHNICAL SALES AGENTS

A CHP unit (combined heat & power, also cogeneration) is an independent power & heat generation unit.

It allows the user to either sell the entire amount of generated electricity into the electricity grid or use it for own consumption, and the thermal energy can be used for heating, hot domestic water preparation and various technological processes.

Damvent
to reach...and exceed

Damvent design and manufacture Hybrid Integrated Solutions for Fresh Air. The Max.e3 Range works for every climate and every application where HVAC and 100% Fresh Air is needed. Damvent Units recover 100% of the Heat via a Sorption Thermal Wheel and an air-to-air Heat Pump. It is an all-in-one, plug & play, standalone unit that requires only ducting to function without the need for additional water, electric or DX heating/cooling coils as it is

also a 100% DX Unit.
